HERB HERBERT FAVOURITE HERBS FACT SHEET

avender French

Lavandula dentata 'French'

genus of 21 aromatic perennials and shrubs that are found throughout Mediterranean regions, the Middle East and India. Lavenders are among the most popular plants for herb gardens, having subtle coloring and delightful fragrance. The hardier kinds make attractive hedges, while tender variants may be grown under cover. Lavender differs in habit, foliage and flower color, which range from typical lavenderblue to various shades of purple and white.

DESCRIPTION

Lavender dentata 'French' is a late spring to summerflowering shrub with thick silver-grey, slightly jagged edged leaves. The light purple flowers appear on stalks up to 60cm /39in tall.

Flowers, oil

PROPERTIES

An aromatic, tonic herb with sweet scent. It relaxes spasms, benefits the digestion, stimulates the circulation and uterus and lowers fever.

USES OF THE HERB

Culinary

Fresh flowers are crystallized or added to jams, ice creams, and vinegar.

Medicinal

Internally for indigestion, depression, anxiety, tension headaches, migraine and bronchial complaints.

> Externally for burns, sunburn, rheumatism, muscular pain, cold sores and insect bites. Aromatic

Flowers are popular for use in potpourri and other crafts. The color holds well when dried.

Economic

Oil is used in perfumery and toiletries.

CULTIVATION

Well-drained soil in an open, sunny position. Trim hedges and cut specimen plants back in spring to encourage bushiness. Lavender becomes woody with age and are best replaced every 3-4 years.

HARVEST

Flowers are picked as they begin to open and used fresh, distilled for oil or dried for use in infusions and crafts.
